

# Heavy Duty Latched SmartPlug

## KSI SmartPlug SAM

The KSI SmartPlug Security Asset Manager (SAM) is now available in both our standard SmartPlug and our new heavy duty latched SmartPlug. The KSI SmartPlug SAM allows for assets attached to our SmartPlugs to be assigned to one or more users and may be plugged into any open position in the SAM. Each SmartPlug includes a unique electronic serial number associated with the asset. This enables the SAM to know when assets have been removed or returned and which authorized user was responsible for the action. The SmartPlug SAM illuminates the appropriate asset positions for each authorized user after they gain entry through the SAM's electronically locked door. User authentication can be implemented via entry of a PIN; or with optional proximity card, magnetic card, or biometric input.

Heavy Duty Latched SmartPlugs are constructed from sturdy stainless steel, and coupled with our patented Tamper-Proof Key Rings®, they are engineered and built to stand up to rough handling and use.

## Heavy Duty Latched SmartPlug SAM

The new Heavy Duty Latched SmartPlug adds the ability to entrap and selectively release individual SmartPlugs. With this patent pending technology, you still have the flexibility enabled by our SmartPlug architecture. You can physically limit which assets an authorized user can remove with intelligent, easy-to-configure, latching and release rules powered by our Global Facilities Management Software (GFMS).

## Global Facilities Management System

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installs. System integration and custom application are cornerstones of our philosophy towards system management.

Our flexible solutions allow control and monitoring of your Key Systems, Inc. Security Asset Managers and GFMS software from anywhere in the world. Use a browser on any pc, laptop, smartphone, or tablet without regard to operating system.

Key Systems, Inc. will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope, and pre-existing technology.

Latched Smart Plugs / Keys	W	H	D	Weight
16 Available Positions	18"	18"	6"	20 lbs.
32 Available Positions	18"	27 $\frac{1}{8}$ "	6"	45 lbs.
